PROFESSIONAL SUMMARY

ACPO-certified Business Analyst with **4+ years of combined experience in engineering and business analysis** driving Requirements Elicitation, BRD/FRD Documentation, BPMN-based Business Process Modeling, Product Backlog Development, Sprint Planning, and UAT Facilitation for enterprise-grade software applications.

WORK EXPERIENCE

Business Analyst

Jun 2024 – Present

Digitalization Department, Aker Solutions

Mumbai, India

- Transitioned into the newly established in-house IT division as one of its **first 10** team members, stepping into a Business Analyst role managing **digital transformation initiatives**.
- Facilitated **5+** in-person requirement **elicitation** workshops across India & **Norway** with international stakeholders, applying BPMN-based **AS-IS/TO-BE** process mapping and gap analyses to surface actionable improvement opportunities.
- Developed data-driven **Business Cases**, SWOT, and cost-benefit analyses for executive management, securing **multi-lakh to crore-level** capital funding for enterprise software initiatives.
- Authored **BRD/FRD** documentation and maintained requirements traceability matrices; **accelerated** the documentation cycle by **50%** by leveraging **AI** tools to convert workshop transcripts into preliminary drafts.
- Leveraged **AI** tools to create low-fidelity **wireframes** and prototypes from functional requirements, accelerating early-stage solution visualization, stakeholder validation, cost estimation, and architectural analysis.
- Owned a backlog of **50+ user stories** in Azure DevOps across 10+ sprints, authoring detailed acceptance criteria and driving **95%** on-time delivery of high-priority features.
- Assisted Senior BA in facilitating **User Acceptance Testing (UAT)**, documenting defects identified during workflow demonstrations, and ensuring their timely rectification and product deployment.
- Designed and maintained post-launch Power BI **user analytics** dashboards backed by **SQL** queries, tracking user adoption, success metrics, and operational performance to drive product iterations.

Engineer

Aug 2022 – May 2024

Piping Department, Aker Solutions

Mumbai, India

- Streamlined global 3D model conversion workflows for 500+ equipment assets by implementing automated Excel and Power BI reporting, reducing manual tracking efforts and ensuring real-time stakeholder alignment.

EDUCATION

Sardar Patel College of Engineering

Mumbai, India

Bachelor of Technology in Mechanical Engineering (CGPA – 9.3)

PROJECTS

ValvCalc (Aker Solutions) | **JavaScript, ASP.NET Web API, Postman, Azure DevOps**

Oct 24 – Mar 25

- Identified the requirement, scoped, and solo-built the department's first full-stack web platform, achieving a zero-defect first-time production release and enabling secure IP protection.

Text2Query: AI-Based Database Querying Engine ([Link](#)) | **Python, Streamlit, Llama, SQL**

Oct 25 – Dec 25

- Built an AI-powered database querying engine, enabling non-technical BAs & Product Managers to retrieve data from complex databases via plain-English queries, cutting query writing and rectification time by **50%**.

SKILLS AND CERTIFICATIONS

Business Analysis: Requirements Elicitation, BRD/FRD and API Documentation, Requirements Traceability Matrix, BPMN, Stakeholder Management, Business Process Modeling, Gap Analysis, Product Backlog Management, Sprint Planning, Wireframing, UAT Facilitation, Cross-Functional Team Management, SDLC

Tools: Azure DevOps, Jira, Confluence, Figma, API (REST), Postman, SQL, Power BI, Python, LLM, Langchain

Certifications: Agile Certified Product Owner (ACPO) ([Link](#))
